

Erratum

In *Planting stress in newly planted jack pine and white spruce. 2 Changes in tissue water potential components*, by S.C. Grossnickle, *Tree Physiology* 4(1):85–97, 1988 a term was omitted from the equation on Page 88. The correct version is:

$$\epsilon_{\max} = \frac{(\psi_{p1} - \psi_{p2})}{(V_1 - V_2)/V_0}$$

where ψ_{p1} and ψ_{p2} are turgor pressures determined for water saturation deficits less than three percent, V_1 and V_2 are relative symplastic volumes at ψ_{p1} and ψ_{p2} , respectively, and V_0 is symplastic volume at full turgor.
